## **New Documentary Film Focuses on How We See God 2011 Heartland Film Festival to Host World Premiere of “God In The Box”**

Take a look inside the mind’s eye, as everyday people across America try to define God in the new documentary film, “God In The Box,” which will premiere this October at the Heartland Film Festival in Indianapolis. In the film, director Nathan Lang, and his crew travel the country capturing a diverse collection of personal stories, of how we view God, and why, through the lens of an amazing Box.

*What does God mean to you? What does God look like to you?*

The film chronicles the journey of a curious Box that pops up on street corners, where people step inside and share drawings and testimonials illustrating their private views of God. Theologians, historians and a mythologist join us on the journey to understand why we see God the way we do in the 21<sup>st</sup> century.
